

Rippa Grippa

Lifting Jib

- No more back injuries
- Increased productivity
- A safe easy way to handle the unusual shaped objects and ease the O.H.S. & W issues on any construction site

The **Rippa Grippa™-Lifting Jib** has been designed for ease of operation.

Attach to any mini skid steer or large skid steer loader and you now have a small mobile crane. Great for those objects that won't fit in your bucket and will increase the flexibility of reach.

Kanga Kid Skid Steer

- Fixed 300 mm long **straight boom**.
- SWL 100 kg.

Mini Skid Steer (Kanga, Dingo, Thomas, etc)

- Articulated 600 mm long **straight boom**
- SWL 150 kg - 250 kg.
- Reach Height 1.6 metres (when using Rippa Grippa - Sleeper Grab)

Mini Skid Steer (Kanga, Dingo, Thomas, etc)

- Articulated 600 mm long **stepped boom**.
- SWL 150 kg.
- Reach Height 2.0 metres (when using **Rippa Grippa - Sleeper Grab**)

Rippa Grippa™-Lifting Jibs are available for all large skid steer loaders, utilising the same features, but with a longer reach and larger lifting capacity.

Designed and Manufactured in Australia.
